Re: **PROVISIONAL U.S. PATENT APPLICATION – FILING RECEIPT AND MISSING PARTS NOTICE**
Title: ADDITIVE FOR LIQUID FUELS, FUEL COMPOSITIONS BASED ON THE ADDITIVE, AND METHODS OF MANUFACTURE
Serial No.: 63/088842
Filed: October 7, 2020
Our Reference: FUELG.002PR

Dear Kirill:

We are pleased to enclose a copy of the Official Filing Receipt for the above-identified provisional patent application. This receipt confirms that the application was filed in the U.S. Patent and Trademark Office (USPTO) on October 7, 2020 and assigned Application No. 63/088842.

Also attached is the Notice of Missing Parts received from the USPTO, which notes that the application was filed without identifying the inventors. Please let me know if the list of inventors for this application is the same as that of FuelGems' previously-filed PCT application (our ref. FUELG.001WO) which listed the following individuals as inventors: levgen Polunkin, Jacek Bogdan Jacinski, Dmytro Vinnichenko, and Kirill Gichunts,

A response to the Notice to identify the inventors is initially due December 28, 2020 but this deadline can be extended for a total of five additional months with increasingly higher extension fees (the fees get significantly more expensive after the first two months of extension).

PLEASE NOTE: A provisional patent application is regarded as abandoned one year after its filing date. Therefore, in order to benefit from the filing date of the provisional application, **a regular patent application claiming priority from this provisional application must be filed on or before October 7, 2021. Also, for most foreign countries, failure to file a foreign patent application within this same year may preclude patent protection for your invention abroad.**

Therefore, please mark this deadline on your calendar for preparing and filing any regular patent applications in the U.S. or in any other foreign jurisdictions.

If you have any questions, please do not hesitate to contact us.

Sincerely,

Bruce S. Itchkawitz, Ph.D.
